Office Action Summary

Art Unit: 3739

It is noted that the instant application does not meet the criterion to be a continuation in part as the applications must be copending. The instant application was filed December 26, 2000. The final rejection in the parent case was issued on June 20, 2000 and a 3 month shortened statutory period that expired on September 20, 2000. Then applicant filed a Notice of Appeal with a certificate of mailing dated September 20, 2000. The Notice of Appeal kept the application pending for two months until November 20, 2000 which was a Monday and is the date of Abandonment of Serial Number 08/910,085

1. Claims 1 and 4 rejected under 35 U.S.C. 103(a) as being unpatentable over ^aYavitz in combination with Telfair. Telfair teaches a method such as claimed except for the creation of an energy map per se. Yavitz teaches that creating an energy map aids in the determination of the ablation profile created by the laser surgery. It would have been obvious to the artisan of ordinary skill to produce an energy map from the cumulative data gathered by the frame grabber of Telfair, since this produce a good indication of the final corneal profile, as taught by Yavitz, thus producing a method such as claimed.
2. Claims 2, 3, 5, and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
